Dear Sir / Ma'am,

I am an experienced Software Developer transitioning into Project Management, bringing a strong technical background and a deep understanding of software development processes. With hands-on experience in programming languages such as Python, Vue.js, PHP, Node.js, and JavaScript, as well as expertise in databases like MongoDB, MySQL, and PostgreSQL, I have developed a keen ability to bridge the gap between technical teams and business objectives.

In my current role, I have successfully led initiatives to maintain and enhance an organization's legacy web based projects, ensuring optimal performance and user experience. Additionally, I have designed and implemented custom dashboards and websites tailored to departmental needs, streamlining workflows and improving data accessibility. My experience with Power BI has enabled me to develop interactive dashboards, providing actionable insights that drive informed decision-making. Beyond development, I have collaborated cross-functionally with teams, managed timelines, and ensured project deliverables.

As I transition into project management, I am eager to leverage my technical expertise, problem-solving skills, and leadership abilities to drive successful project execution. I am confident in my ability to manage resources efficiently, facilitate effective communication among stakeholders, and ensure projects are delivered on time and within scope. I look forward to the opportunity to contribute to your organization's success as a Project Manager.

Sincerely,

M Ahmad Khan

Objective

Results-driven Software Developer with hands-on experience in full-stack development, web maintenance, and custom dashboard creation. Proficient in a range of programming languages, including Python, Vue.js, PHP, node.js and JavaScript, and skilled in database management with MongoDB, MySQL, and PostgreSQL. Known for developing responsive, user-friendly applications and implementing data-driven solutions through tools like Power BI. Demonstrated ability to deliver real-time applications, such as an age and gender detection system, and mobile apps with geolocation features. Committed to continuous learning and delivering impactful solutions.

Experience

Master Molty Foam | Software Developer Present)

(Feb 2024 -

- Maintained and updated the company's legacy website, ensuring functionality and performance improvements.
- Developed various custom websites and dashboards, tailored to departmental needs for improved data visualization and accessibility.
- Designed and implemented multiple forms for the department's internal website, optimizing workflows and information collection.
- Created and customized Power BI dashboards to present data insights effectively, aiding decision-making.

Programmers Force | Front-End Developer Intern 2023)

(Nov 2022 – Jan

- Developed high end websites, utilizing HTML, CSS, JavaScript, Bootstrap and node.js, php, python to create an interactive, user-friendly interface.
- Applied responsive design principles and UX best practices to ensure a seamless user experience across various devices and browsers.
- Engaged in collaborative coding and peer review processes, participating in version control and team discussions to enhance code quality and ensure consistent standards across projects.
- Gained foundational experience in frontend technologies, enhancing problem-solving skills and developing a deeper understanding of the frontend development lifecycle.

Education

Bachelor of Science in Software Engineering | Superior University Lahore **2019 - 2023**

- **Achievements:** 2nd runner-up in the university Technopreneurship Competition for a project on agriculture solutions.

FSC Pre-Engineering | Superior Group of Colleges **2017 - 2019**

Matriculation | Universal High School for Boys **2015 - 2017**

Technical Skills

Soft Skills

- **Languages:**
Python, Vue.js, PHP, JavaScript, Node.js, HTML5, CSS3, Bootstrap
- **Tools:**
VS Code, Visual Studio, DBeaver Community, Microsoft SQL Server Management, Power BI, Excel, XAMPP
- **Databases:**
MongoDB, MySQL, PostgreSQL

- Analytical Thinking
- Adaptability
- Collaboration
- Attention to Detail
- Time Management
- Effective Communication
- Problem-Solving
- Communication

Academic Projects

FINAL YEAR PROJECT | Age and Gender Identification through Videos

- Developed a Python software for real-time age and gender detection from video streams.
- Created a Flutter mobile application to provide sales and updates about nearby brands, utilizing geolocation features.
- Integrated machine learning algorithms for accurate demographic identification, enhancing customer engagement.
